

BE 5 Exercises

Nov 13th

Exercise 1 (Watch Express Tutorial)

Go to this [Node.js & Express course](#) and watch From [\(6:10:46\)](#) **Middleware - Setup** to [\(8:05:36\)](#) **Express Router – Controllers** (Last section)

(you can access the sections from the YouTube video comments section)

Exercise 2 (Routers)

Refactor your code to use Express Routers

Exercise 3 (Middleware)

Use a middleware function to process the form that you implemented on your website. For now just return a response to confirm to the user that you have processed his form submission. You don't need to store anything.
