BE 3 Exercises

Nov 13th

Exercise 1 (Watch Node.js & Express Video)

Go to this Node.js & Express course and watch the following sections:
- (11:08) **Repl**
- From (1:34:29) **Http Intro** TO (2:23:22) **Package-Lock.Json**
- From (4:03:25) **Http Basics** To (4:37:20) **Http - App Example**
- From (4:48:02) **Express Info** to (6:07:31) **Additional Params And Query String Info**
- From (6:10:46) **Middleware - Setup** to (8:05:36) **Express Router – Controllers** (Last section)

(you can access them from the video comments section)
Note: If you need a refresher on the previous lecture you can **watch the full video** (Optional)

Exercise 2 (Setup Basic Express Routing)

- Setup your project to use express framework
- Navigate the website visitors to your different pages using http methods provided by the express app

Exercise 3 (Routers)

Refactor your code to use Express Routers

Exercise 4 (Middleware)

Use a middleware function to process the form that you implemented on your website. For now just return a response to confirm to the user that you have processed his form submission. You don't need to store anything.
